Y42V SOFTWARE

Download & Installation Guide

Creating Catalogs or Brochures | Windows desktop application | Version 1.47

1 Before you begin

This guide is for Windows 10 and Windows 11 computers. You need an internet connection to download the installer and permission to install software on your PC.

Download source: The official Y42V website, y42v.com.

2 Download the installer

1. Visit https://y42v.com and scroll to the Download the software section.
2. Click Download for Windows. Your browser should begin downloading the installer.
3. If prompted, choose Save. Find the downloaded file in your browser downloads or Windows Downloads folder.

Installer filename: Y42V_Creating_Catalogs_or_Brochures_Setup_V1.47.exe

Direct download: Open the official installer link

3 Install the software

1. Double-click the downloaded .exe installer.
2. If Windows asks whether to allow the installer to make changes, review the application information and continue only if you trust the file and its source.
3. Follow the instructions shown in the installation wizard. Review the installation location and any options before confirming.
4. Wait until installation finishes. Close the wizard using its final button.

4 First launch

1. Open Creating Catalogs or Brochures from the installed application shortcut or Windows Start menu, if provided by the installer.
2. Explore the application and its product-list, image and export features. Follow any licensing or activation instructions shown inside the application.

Security, troubleshooting & support

Useful information for a safe installation

5 Windows SmartScreen warning

On some computers, Microsoft Defender SmartScreen may display a warning such as “Windows protected your PC” or identify an unknown publisher. This can happen when an installer is not code-signed by a recognized publisher or has not established a download reputation. It is not, by itself, proof that the file is malicious or safe.

Recommended approach: Download only from the official Y42V address above. Keep Microsoft Defender enabled, allow Windows to scan the file, and do not bypass a warning unless you have independently verified the file and are comfortable proceeding.

6 Troubleshooting

A. The download does not start: Retry the official website link. Check your browser’s downloads panel and internet connection.

B. The downloaded file will not open: Confirm the filename ends in .exe and the download completed. If antivirus reports a threat, do not disable protection; contact Y42V support.

C. Installation is blocked: Your Windows account or organization may restrict software installation. Contact your computer administrator if needed.

D. The application does not start: Restart Windows once and retry. If it still fails, note the exact error message and contact support.

7 Licensing and activation

Software download and software licensing are separate steps. Subscription and activation arrangements may apply. Please contact Y42V Software for current licensing information; this guide does not promise an unrestricted or time-limited free trial.

8 Support

Email: contact@y42v.com
Website: https://y42v.com

When contacting support, include your Windows version, the installer version (1.47), and the exact error message. Do not email passwords, license secrets, or other sensitive information.
